

You completed this test on 07/09/2022, 13:42

Your score is 76.54%

Congrats! You're now a Board Practitioner Certified Consultant!

You'll receive in few minutes an email with your certificate. Please check your inbox.

Please note that your certificate is available also under the "Progress" section of the platform.

INCORRECT

Promotion Campaigns for ice creams during some particular period are Boolean [*Competitive Models*]

INCORRECT ☆☆☆

In my procedure I use a data-flow to copy info-cube A ("*Sales Amount*" structured by Year and Customer) into info-cube B ("*Sales Amount Y*" structured by Year). The total amount of the infocube (A) for the year 2020 is 100 units: 80 units for Customer X and 20 units for Customer Y. Before the data-flow, we execute an 'Info-Cube Clear' Command for info-cube B. If we run the procedure twice, the amount of the infocube B for the year 2020 is then:

200

100

0

INCORRECT ☆☆☆

I am new in the organization and I have been asked to log in to the Board Sales Reporting Solution via the dedicated URL. I have been assigned a Lite User license. Can I edit the layout of an existing report?

Yes, I can edit and save it

Yes, I can edit but not save it

No, I can't as I need a Power User license

INCORRECT ☆☆☆

Can the Board business Users with *Lite* licenses subscribe to existing reports?

Yes, they can subscribe to a Screen or to a Screen Area

Yes, they can subscribe to a Screen only

No, they cannot

INCORRECT ☆☆☆

The new Business analyst is trying to display a bar chart by month (categories) for the current year sales revenue. She then wants to add a breakdown of the revenue by channel on the month column.

Add the Channel entity as a “category”, and activate the “Detail by” option within the block options

Add the Channel entity as a “series”, and activate the “Cluster” option within the chart settings

Add the Channel entity as a “series”, and activate the “Stack” option within the chart settings

INCORRECT ☆☆

The supply chain manager has requested we add a new axis of analysis (City) to their stock replenishment report by Customer. The file we have been provided is the following:

	Cust_cod	City_cod	CYACT	Budget
ABA	NYC	55	20	
BAB	BNC	86	10	
	BBC	BNC	50	50
BAB	TKO	93	15	
	CBA	TKO	67	50
BCA	MRK	90	15	

City is a parent entity of the Customer entity; we can create a relationship or hierarchy

City is not a parent entity of the Customer entity; we must add it as a dimension of the Stock replenishment Info-cube

City is a child entity of the Customer entity; we can create a relationship or hierarchy

INCORRECT ☆☆

I wish to have a screen to add and manage the new elements of the P&L Accounts entity and the parent P&L Account Group entity .

I need to build two distinct entity Editor objects (one per each entity)

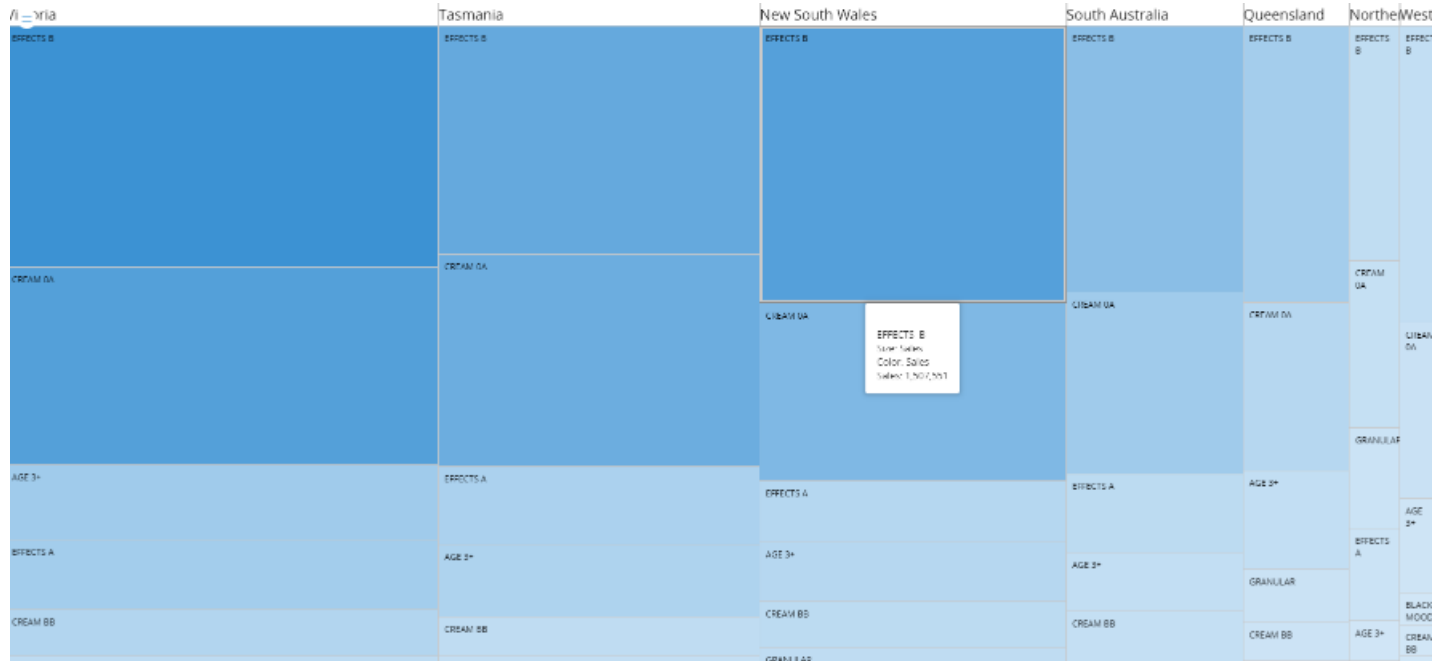

I need to build an entity Editor enabling the option “Insert/Edit Parent relationship” for the child entity

I need to build an entity Editor enabling the option "Insert/Edit parent relationship" for the child entity

I need to build an entity Editor enabling the option "Insert/Edit new member" for both entities

INCORRECT ☆☆☆

The Sales Director wants to see a chart that shows the best performing Regions and Product Groups. Which Option have I used in the Treemap below?

Hierarchical

Horizontal

Vertical

INCORRECT ☆☆☆

In a Board procedure, the Command: *Go to Screen* is entered, with the *Disable Initial Layout Execution* option enabled. Info-cubes are properly populated. The procedure is run, and:

All available objects (1 Dataview and 3 Charts) within the landing screen are properly displayed, since an automatic refresh screen is triggered while the screen was opening

All available objects (1 Dataview and 3 Charts) within the landing screen are temporarily disabled; a manual refresh of the screen is required

All available objects (1 Dataview and 3 Charts) within the landing screen are not showing data properly; a manual refresh of the screen is required

INCORRECT ☆ ☆

One of my users asked me if it is possible to export only a subset or an area of the screen in Board.

Yes, Board allows you to export an area of a screen via the AREA option

Yes, Board allows you to export an area of a screen via the AREA option but only in PDF format

No, such an option does not exist in Board

Passed. Let's continue.
